Email 1 — Assignment Extension Request

To:

professor.sharma@university.edu

Subject:

Request for Extension on Assignment Submission — Data Structures (CS201)

Dear Professor Sharma,

I hope this email finds you well. I am Samagra Gune, a first-year student in the Computer Science and Engineering programme (Roll No. 25BCE10462), currently enrolled in your Data Structures course.

I am writing to request a short extension on the upcoming assignment due on 4th April 2026. Over the past week I have been unwell and, despite my best efforts to keep up with the coursework, I have not been able to complete the assignment to the standard I would like to submit it at. I do not want to hand in work that does not reflect the effort the subject deserves.

I completely understand if this is not possible given the course schedule, and I will not make a habit of such requests. If an extension is granted, I am confident I can submit a thorough piece of work within three to four additional days, by 8th April 2026 at the latest.

I would be happy to discuss this further at your convenience, either during office hours or over email. Thank you for your time and understanding.

Warm regards,

Samagra Gune

B.Tech, Computer Science and Engineering (First Year)

Email 2 — Summer Internship Expression of Interest

To:

internships@techcorp.in

Subject:

Expression of Interest — Summer Internship Opportunity 2026

Dear Internship Coordinator,

My name is Samagra Gune and I am a first-year student pursuing B.Tech in Computer Science and Engineering at VIT University (Roll No. 25BCE10462). I came across TechCorp's summer internship programme and wanted to reach out to express my genuine interest in being considered for a position this summer.

I am at an early stage in my academic journey, but I have been proactively building skills outside the classroom as well. I have set up profiles on GitHub and Kaggle, completed beginner challenges on HackerRank, and have been learning Python and foundational data structures. I am eager to take that learning into a real work environment where I can contribute meaningfully and grow much faster than I could on my own.

I am particularly drawn to TechCorp because of the kind of work your team does in software development and technology solutions. I believe even a short internship here would give me a far clearer sense of how professional teams operate and would help me focus my studies in the right direction.

I have attached my resume for your reference. I would welcome the opportunity to speak with you further about any openings that might suit a motivated first-year student. I am available at your convenience and can be reached at the contact details below.

Thank you for taking the time to read this email. I look forward to hearing from you.

Sincerely,

Samagra Gune

B.Tech, Computer Science and Engineering (First Year)
